♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

NEC America (cont'd)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

Texas Instruments (cont'd)

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

♦ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

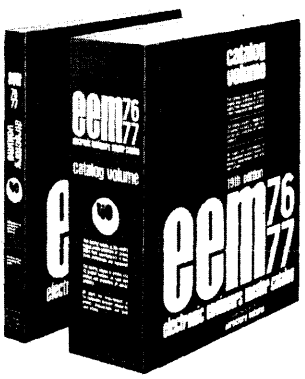
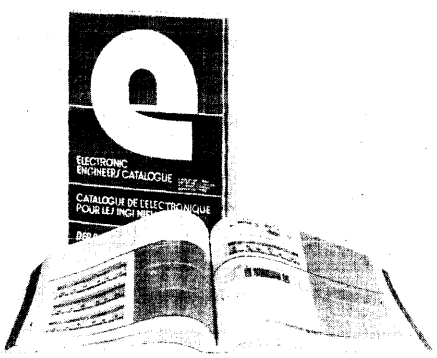
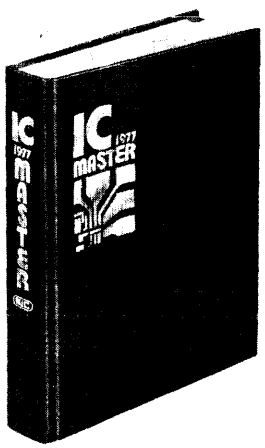
ABBREVIATIONS OF COMPANY NAMES



AD	Analog Devices
AMD	Advanced Micro Devices
AMI	American Microsystems, Inc.
Analogic	Analogic Corp.
Beckman	Beckman Instruments, Helipot Division
Burr-Brown	Burr-Brown Research
Cermetek	Cermetek
CMA	Consumer Microcircuits of America
Cybernetic	Cybernetic Micro Systems
Data General	Data General
Datel	Datel Systems
DDC	Data Devices Corp.
Delco	Delco Electronics
EA	Electronic Arrays
EMM/Semi	EMM Semi, Div. of Electronic Memories & Magnetics
Essex	Essex International
Exar	Exar Integrated Systems
Fairchild	Fairchild
Ferranti	Ferranti Electric
Fujitsu	Fujitsu
GI	General Instrument
Harris	Harris Semiconductor
Hitachi	Hitachi America Ltd.
Hughes	Hughes Aircraft Solid State Products
Hybrid Sys	Hybrid Systems
HyComp	HyComp
IMI	International Microcircuits, Inc.
Intech/FMI	Intech/Function Modules Inc.
Intel	Intel
Interdesign	Interdesign
Intersil	Intersil
IPI	Integrated Photomatrix, Inc.
ITT	ITT Semiconductors
Lambda	Lambda Electronics
LSI	LSI Computer Systems
Master Logic	Master Logic
Micro Comp	Micro Components
Micro Net	Micro Networks
Micropac	Micropac Industries
Micro Power	Micro Power Systems
Micro Tech	Microcircuits Technology
Mitel	Mitel Semiconductor
Mitsubishi	Mitsubishi Electric Co.
MMI	Monolithic Memories, Inc.
MOS	MOS Technology
Mostek	Mostek
Motorola	Motorola Semiconductor
National	National Semiconductor
NCR	NCR Corp., Microelectronics Division
NEC	NEC America
NEC	NEC Microcomputers
Nippon	Nippon Electric Co.
Nitron	Nitron
Nortec	Nortec Electronics
Novonics	Novonics
OEI	Optical Electronics, Inc.
Panasonic	Panasonic, Matsushita Electric Corp.
Photo Therm	Photo Therm
Plessey	Plessey Semiconductors
PMI	Precision Monolithics, Inc.
Raytheon	Raytheon Semiconductor
RCA	RCA Solid State Division
Reticon	Reticon
RIFA	RIFA
Rockwell	Rockwell Microelectronic Division
RTC	Real Time Corp.
Sanken	Sanken Electric
Sanyo	Sanyo Electric
SGS	SGS-Ates Semiconductor
Siemens	Siemens
Signetics	Signetics (Philips)
Silicon G	Silicon General
Siliconix	Siliconix
Silicon Sys.	Silicon Systems, Inc.
Silitronics	Silitronics
Solitron	Solitron Devices
Sprague	Sprague Electric Company
SSM	Solid State Music
SSS	Solid State Scientific
Synertek	Synertek
Tektronix	Tektronix
Teledyne C	Teledyne Crystalonics
Teledyne P	Teledyne Philbrick
Teledyne S	Teledyne Semiconductor
Telefunken	AEG-Telefunken
TI	Texas Instruments
TMX	TMX
Toshiba	Toshiba
Trans-Data	Trans-Data
TRW	TRW
Western	Western Digital
Zilog	Zilog



©IC MASTER 1978



we know

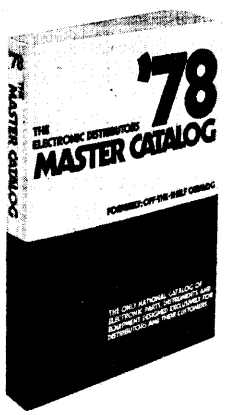
40 years of experience in

United Electronics

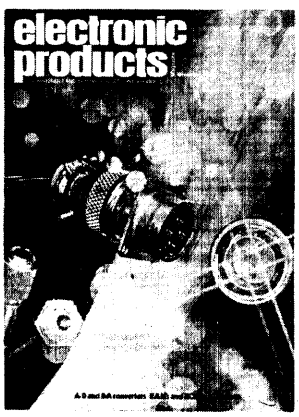
eem/ELECTRONIC ENGINEERS MASTER CATALOG —

The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

ELECTRONIC ENGINEERS CATALOGUE —



The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.



IC MASTER AND THE UPDATES —

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

our stuff...

cataloging, 20 editions of eem Technical Publications Division

ELECTRONIC DISTRIBUTORS MASTER CATALOG —

(Formerly O-T-S Catalog) The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

ELECTRONIC PRODUCTS MAGAZINE —

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

eem FILE SYSTEM —

The only filing system designed specially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

MANUFACTURERS AND DIRECTORY DISTRIBUTORS

The Manufacturers and Distributors Directory is a comprehensive telephone directory of the entire IC industry. It places at your fingertips the names and phone numbers you need to know. It includes manufacturers, field sales offices, representatives and distributors. The manufacturers' listings tell you where and whom to call to obtain technical and ordering information. It enables you to ask for the right person or phone extension. It gives you the terminology understood by the individual company's switchboard operators, e.g., in some companies you should ask for sales, in others, customer service. This directory will reduce frustration and save you time.

Advanced Micro Devices

Advanced Micro Devices, Inc.
901 Thompson Place
Sunnyvale, California 94086
(408) 732-2400
TWX: (910) 339-9380
Telex: 34-6306
Federal I.D. 34355

Specific Product Information:
Bipolar Microprocessors ..... John Springer
Bipolar Memory ..... Ralph Cognac
Logic (MSI) ..... Mike Walton
Hi-Rel Logic and Interface ..... Len Seib
MOS Microprocessors and Support Circuits ..... Andrew Allison
MOS Serial Memory, Mask-programmable ROM's and E-PROM's ..... Peter Gregg
MOS-RAM's ..... Raju Shah
Computer Interface ..... Al Tremain
Linear ..... Steve Thompson
Application Engineering:
Bipolar Digital Products ..... Roy Levy
MOS Products ..... Joe Kroeger
Linear Products ..... Russ Apfel
Literature ..... Literature Dept.
Price and Delivery ..... Contact AMD Sales Office, Rep. or Dist.
Follow-Up on Orders ..... Customer Service Dept.
All Other Information....Corporate Communications Dept.

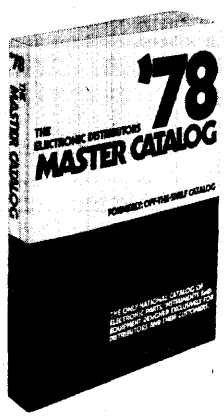
we know

40 years of experience in United Electronics

eem/ELECTRONIC ENGINEERS MASTER CATALOG —

The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

ELECTRONIC ENGINEERS CATALOGUE —



The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

IC MASTER AND THE UPDATES —

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

our stuff...

cataloging, 20 editions of eem Technical Publications Division

ELECTRONIC DISTRIBUTORS MASTER CATALOG —

(Formerly O-T-S Catalog) The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

ELECTRONIC PRODUCTS MAGAZINE —

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

eem FILE SYSTEM —

The only filing system designed specially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

PRODUCT INDEX

This index shows the page and the line on that page of every device in the Master Selection Guide and the Application Note Directory. It is organized alphabetically by manufacturer and for each manufacturer, alpha-numerically by device. Bold face listings lead to data on important products which have been supplied for you by the manufacturers. If you want to determine which products are in the book from a given manufacturer, simply check the Product Index.

how to use the product index

The Product Index contains the same references as the Part Number Index, but in this case the listings are sorted by manufacturer.

As in the Part Number Index, the model numbers are sorted alpha-numerically from **left** to **right.** Here the manufacturer's prefixes are included so that devices with alphabetic prefixes appear before those without them (i.e., LM101 would be before 1101). Application note pages are indicated by a ¶ sign and data by a ★ sign. The numbers preceding the dash are the page numbers, while those following the dash indicate the location on the device on the page.

When you use the Master to find data on a particular manufacturer's products, this index provides the fastest way to find all the information.
